Response to Amendment

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thornton*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 44-47 and 50 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 12-14 of U.S. Patent No. 6,951,453. Although the conflicting claims are not identical, they are not patentably distinct from each other because the major difference between claim 44 of the instant application and claim 14 of the Patent is the intended use language that "the insert cavity is configured to substantially correspond to the length of an external portion of the preform received therein". Clearly, the porous insert of claim 14 of the Patent is capable of deforming and cooling a preform that is the same length as the mold cavity.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 44-50, 52, 57, 58, 70/44-70/50, 70/52, 70/57 and 70/58 are rejected under 35 U.S.C. 102(b) as being anticipated by Farrell (4,034,036: figures 1-5; column 2, lines 6-13 and 38-51; and column 3, lines 1-35).
5. Farrell teaches a mold for reshaping an injection molded preform (12), the mold comprising: sintered metal porous inserts (14a, 14b) that corresponds to the length of the preform (12). The sintered metal insert is of a foraminous structure, wherein the pores of foramina are sufficiently small so as to prevent thermoplastic material from entering and clogging the pores, but permit the passage of air or other fluids particularly gases therethrough. The mold includes a vacuum passage (26) that serves to draw vacuum through the pores of the porous inserts (14a, 14b). The neck molds (20a, 20b) serve as a seal. The language that “the insert having a surface defining a cavity that is configured to substantially correspond to the length of an external portion of the preform received therein” is intended use. The mold of Farrell is capable of reshaping a preform having a length that substantially corresponds to the length of the cavity of the porous insert.

Allowable Subject Matter

6. Claims 34-43, 60-65, 67-69, 70/65, 70/67-70/69 and 71-76 are allowed.

7. Claims 51, 53-56, 59, 70/51, 70/53-70/56 and 70/59 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

8. Applicant's arguments with respect to claims 44-50, 52, 57, 58, 70/44-70/50, 70/52, 70/57 and 70/58 have been considered but are moot in view of the new ground(s) of rejection.
